

INNOVATION salt chlorinator

Compact, with a transparent and light cell

CCEI has developed **light electrolysis**. ZELIA's compact and light salt electrolyser is fitted with a transparent cell whose colour varies according to salinity and water temperature of the pool.

Zelia

Light transparent cell (Patented)

whose colour varies according to the temperature and salinity of the water. The user, when opening its technical area, becomes immediately aware of the state of the treatment device and can be confident of the water quality:

Stationed production, colour according to the water temperature:

Production in process, colour according to the salinity rate:

An efficient and optimum production

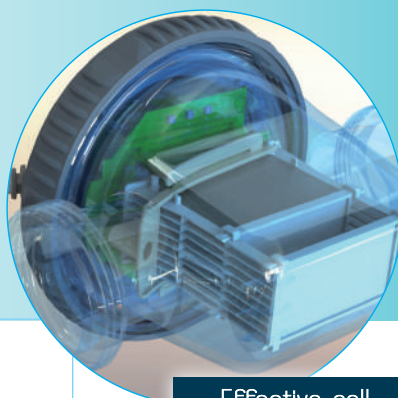

- According to the water temperature
- Reduced when the automatic cover is closed
- 8 production methods by choice

Compact and resistant monobloc cell

- Fitted with full titanium plates.
- Compact to be inserted in the most confined of spaces
- Self-cleaning of the cell by polarity reversal.
- Heightened safety by integrated flow detection.

Installation in just a few minutes

Easy connection to a connector.
Specially adapted to buried technical spaces.

Effective cell

Coffret d'alimentation

Guarantee the bathing water quality

ZELIA range	ZLT 30	ZLT 60	ZLT90
Reference	PF10I060	PF10I061	PF10I062
Pool volume	30 m ³	60 m ³	90 m ³
Consumed power	40 W	70 W	100 W
Dimensions	175x125x60 mm		
Cell length	185 mm (1,5")		
Power voltage	230V AC / 50Hz		
Rate - max. pressure	22m ³ /h - 3 bar		
Salt rate	2 to 5g		

The CCEI guarantee: 40 years' experience

Products designed and manufactured in France. Effective technical and sales teams who are always prepared to listen to your needs and concerns.
